SUMMARY

Skilled software engineer, focusing on front-end development. I'm dedicated to creating great experiences for users with easy-to-use and nice-looking interfaces. I pay close attention to detail and always aim to come up with solutions that work well and impress clients. I love exploring new technologies and methods to keep improving and making projects successful.

EDUCATION

COMSATS University, Islamabad.
Bachelor of Science in Computer Science

Lahore, Pakistan
Sep 2019- June 2023

WORK EXPERIENCE

United Software & Technologies Intl - Frontend Developer *Jan 2024 - Present*

- Developed and maintained dynamic, scalable web applications using React.js , delivering efficient and user-friendly interfaces.
- Implemented state management solutions using Redux Toolkit , significantly improving scalability, maintainability, and performance across projects.
- Collaborated with cross-functional teams, including backend developers, UI/UX designers, and project managers, to conceptualize, develop, test, and optimize features, ensuring seamless integration and smooth application functionality.
- Integrated RESTful APIs and third-party services to ensure efficient data flow and augment application capabilities, contributing to enhanced user experiences.
- Integrated MongoDB for database management, handling CRUD operations and ensuring secure data storage.
- Optimized front-end components by employing best practices, such as code splitting and lazy loading, to improve application load times.
- Conducted thorough testing and debugging to ensure high quality code and seamless user experience across different browsers and devices.

Programmers Force - Web Developer Trainee *June – Dec 2023*

- Designed and developed user-friendly front-end interfaces using Vue.js and Vuetify, ensuring seamless navigation and a visually appealing design.
- Implemented Vuex for efficient state management, enabling real-time data synchronization across components and reducing redundancy.
- Translated UI/UX design wireframes into high-quality, scalable, and responsive web pages, ensuring cross-browser and cross-platform compatibility for a consistent user experience.
- Optimized front-end performance by employing code-splitting, lazy loading, and caching strategies to improve page load speeds and reduce application latency.
- Conducted rigorous testing and debugging to identify and resolve complex issues, ensuring a high-quality product.

TECHNICAL SKILLS

- **Languages:** HTML, CSS, JavaScript, TypeScript
- **Frameworks & Libraries:** React JS, Vue JS, Next.js
- **UI Frameworks:** Bootstrap, Tailwind CSS, Vuetify, Material-UI
- **State Management:** Vuex, Redux, Redux Toolkit
- **Version Control:** Git, GitHub
- **Tools:** Postman, Figma, Visual Studio Code, Visual Studio
- **Other Skills:** Responsive Design, API Testing, API Integration

COURSES & CERTIFICATIONS

- **Introduction to Front-End Development - Meta**
  This certificate demonstrates proficiency in the core principles of front-end web development, including HTML, CSS, and Bootstrap. It covers essential techniques for building responsive, user-friendly interfaces and introduces foundational concepts for modern web development practices.

- **React Fundamentals - Udemy**
  A comprehensive introduction to the core concepts of React.js, including component-based architecture, state management, props, and lifecycle methods. This course emphasizes building dynamic, interactive, and scalable web applications using React's declarative approach.
